Disable Radio Button Once Option is Selected

While we do have a built-in feature that will hide a question once it is answered This JavaScript will allow you to still display the question but not allow changes. It works with Radio Button questions and Radio Button Grids.

Check it out in an example survey!

OR

Add a survey with this setup to your account!

The Script

On the same page as your radio button question(s) click **Add New Action > JavaScript.** Give your action a name and click **Save Action and Edit**. Now paste the following code in your JavaScript Action:

```
$(":radio").click(function(){
 var radioName = $(this).attr("name"); //Get radio name
 $(":radio[name='"+radioName+"']:not(:checked)").attr("disabled", true); //Disable all unche
cked radios with the same name
});
```

Scripting and Other Custom Solutions

We're always happy to help you debug any documented script that is used as is. That said, we do not have the resources to write scripts on demand or to debug a customized script.

If you have customization ideas that you haven't figured out how to tackle, we're happy to be a sounding board for SurveyGizmo features and functionality ideas that might meet your customization. Beyond this, you might want to consult with someone on our Programming Services Team; these folks might have the scripting chops to help you to achieve what you are looking for!
