Important Update to Custom Scripting

The CustomScript Action now supports the LUA programming language. Visit our [NEW Lua Scripting Resources!](#)

1. New accounts (created after October 29, 2018) will only have the option to use Lua in scripts.
2. As of October 29, 2018 Custom Scripting Actions will default to Lua as the scripting type in the Custom Scripting Action for accounts created before this date. You will be able to switch to the Legacy Custom Scripting; though we highly encourage using Lua.
3. In the long term, Legacy Custom Scripting Actions will be switched to read-only. The exact date on this is to be determined; we will send notifications well ahead of time.

This function returns the number of checkboxes selected for the given question.

Example

In the below example we get the total checked checkboxes and output it to the page.

[Check it out in an Example Survey](#)

```
%%output .= sgapiCheckboxTotalChecked(2);
```

Output would be the count of the selected checkboxes for the given question ID.
