

sgapiSetRequired(%%questionID, true/false)

Important Update to Custom Scripting

SurveyGizmo's CustomScript Action now supports the LUA programming language. Visit our [NEW Lua Scripting Resources!](#)

Legacy Custom Scripting Language Deprecation Plans

1. New accounts (created after October 29, 2018) will only have the option to use Lua in scripts.
2. As of October 29, 2018 Custom Scripting Actions will default to Lua as the scripting type in the Custom Scripting Action for accounts created before this date. You will be able to switch to the Legacy Custom Scripting; though we highly encourage using Lua.
3. In the long term, Legacy Custom Scripting Actions will be switched to read-only. The exact date on this is to be determined; we will send notifications well ahead of time.

This function toggles the required status of a question.

Example

In this example, if no questions were answered on page ID 1, then question ID 4 is required. In case the respondent goes back and answers a question on page ID 1, the script will un-require the question.

```
%%numberAnswered = sgapiQuestionsAnsweredOnPage(1);  
  
if (%%numberAnswered == 1)  
{  
    sgapiSetRequired(4,true);  
}else{  
    sgapiSetRequired(4,false);  
}
```
