

sgapiSetPageStartingNumber(%%questio

Important Update to Custom Scripting

The CustomScript Action now supports the LUA programming language. Visit our [NEW Lua Scripting Resources!](#)

1. New accounts (created after October 29, 2018) will only have the option to use Lua in scripts.
2. As of October 29, 2018 Custom Scripting Actions will default to Lua as the scripting type in the Custom Scripting Action for accounts created before this date. You will be able to switch to the Legacy Custom Scripting; though we highly encourage using Lua.
3. In the long term, Legacy Custom Scripting Actions will be switched to read-only. The exact date on this is to be determined; we will send notifications well ahead of time.

This function sets the number of the first question of the page (default is 1). You can use this script on each page to restart the question numbering on each page.

Example

The below example script can be placed on the beginning of each page to restart the question numbering on each page.

[Check it out in an Example Survey](#)

```
sgapiSetPageStartingNumber(1);
```
