sgapiSetQuestionRuntimeProperty(%%qID,...

This function sets the specified runtime property for the given question.

Possible Properties	Values
Required	true/false
Soft-Required	true/false
Disabled	true/false
Number (This is the question number displayed at runtime)	question number e.g. 1.

Example

Below is an example script that demos each property available via the sgapSetQuestionRuntimeProperty function.

Check it out in an Example Survey

```
%%property = sgapiGetValue(2);
if (%%property == 'Required')
{
  sgapiSetQuestionRuntimeProperty(3,'Required',true);
}
else if (%%property == 'Soft required')
{
  sgapiSetQuestionRuntimeProperty(3,'Soft-Required',true);
}
else if (%%property == 'Disabled')
{
  sgapiSetQuestionRuntimeProperty(3,'Disabled',true);
}
else if (%%property == 'Number')
{
  sgapiSetQuestionRuntimeProperty(3,'Number',"12.");
}
```
