sgapiHidePage(%%pageID,true/false

This function hides or shows a page.

Example

In this example script we hide pages 3 and 4 by default by setting sgapiHidePage for these page IDs to true. Then, based on the answer to the jedi or sith question on page one we set the sgapiHidePage to false thus showing the appropriate page, jedi or sith.

Check it out in an Example Survey

```
// HIDE PAGES
sgapiHidePage(3,true);
sgapiHidePage(4,true);

// GET THE VALUE OF THE QUESTION TO CONDITIONALLY SHOW THE PAGE
%%jediorsith = sgapiGetValue(2);

// DETERMINE WHICH OPTION IS SELECTED AND SET THE PAGEID ATTRIBUTE TO SHOW THE APPROPRIAT
E PAGE
if (%%jediorsith == 'jedi'){
  %%pageid = '3';
} else {
  %%pageid = '4';
}

// SHOW THE APPROPRIATE PAGE
sgapiHidePage(%%pageid,false);
```
