

sgapiRenderQuestionHTML(%%question)

Important Update to Custom Scripting

SurveyGizmo's CustomScript Action now supports the LUA programming language. Visit our [NEW Lua Scripting Resources!](#)

Legacy Custom Scripting Language Deprecation Plans

1. New accounts (created after October 29, 2018) will only have the option to use Lua in scripts.
2. As of October 29, 2018 Custom Scripting Actions will default to Lua as the scripting type in the Custom Scripting Action for accounts created before this date. You will be able to switch to the Legacy Custom Scripting; though we highly encourage using Lua.
3. In the long term, Legacy Custom Scripting Actions will be switched to read-only. The exact date on this is to be determined; we will send notifications well ahead of time.

This function renders the entire question including all the HTML associated with both the question title, description and answer options.

Example

In the below example we output the results of sgapiRenderQuestionHTML for the below question:

1. Which of these is your favorite pirate phrase?

[Click to review definitions of terms.](#)

- Shiver me timbers! ?
- Splice the mainbrace ?
- Fair winds! ?
- Kiss the gunner's daughter! ?
- Avast, me hearties! ?
- Aye Aye ?

```
%%output .= sgapiRenderQuestionHTML(2);
```

The output will be to render the entire question including all HTML as pictured below.

1. Which of these is your favorite pirate phrase?

[Click to review definitions of terms.](#)

- Shiver me timbers! ?
- Splice the mainbrace ?
- Fair winds! ?
- Kiss the gunner's daughter! ?
- Avast, me hearties! ?
- Aye Aye ?
