sgapiListAdd(%%surveyID, %%item)

Important Update to Custom Scripting

The CustomScript Action now supports the LUA programming language. Visit our NEW Lua Scripting Resources!

1. New accounts (created after October 29, 2018) will only have the option to use Lua in scripts.

2. As of October 29, 2018 Custom Scripting Actions will default to Lua as the scripting type in the Custom Scripting Action for accounts created before this date. You will be able to switch to the Legacy Custom Scripting; though we highly encourage using Lua.

3. In the long term, Legacy Custom Scripting Actions will be switched to read-only. The exact date on this is to be determined; we will send notifications well ahead of time.

This function posts a response to the given survey using the array of items. This is equivalent to creating a SurveyResponse object via the RestAPI. To learn more visit the SurveyResponse API Object documentation.

Example

The below example script demonstrates how to create a response for a textbox, a radio button, and a checkbox question.

```
%%survey_id = 1524919;
%%item = array();

//textbox question, id = 2
%%item{2} = 'test';

//radio question, id = 3, selecting option with reporting value b
%%item{3} = 'b';

//checkbox question, id = 4, selecting options with reporting values a and c
%%item{4} = array('a','c');

sgapiListAdd(%%survey_id, %%item);
```
