

sgapiListRemove(%%surveyID, %%responseID)

Important Update to Custom Scripting

The CustomScript Action now supports the LUA programming language. Visit our [NEW Lua Scripting Resources!](#)

1. New accounts (created after October 29, 2018) will only have the option to use Lua in scripts.
2. As of October 29, 2018 Custom Scripting Actions will default to Lua as the scripting type in the Custom Scripting Action for accounts created before this date. You will be able to switch to the Legacy Custom Scripting; though we highly encourage using Lua.
3. In the long term, Legacy Custom Scripting Actions will be switched to read-only. The exact date on this is to be determined; we will send notifications well ahead of time.

This function removes the given response from the given survey. This is equivalent to deleting a SurveyResponse object via the RestAPI. To learn more visit the [SurveyResponse API Object documentation](#).

Example

The below example removes response ID 24 from survey ID 1234567.

```
%%surveyID = 1234567;  
%%responseID = 24;  
  
sgapiListRemove(%%surveyID, %%responseID);
```
