Important Update to Custom Scripting

SurveyGizmo's CustomScript Action now supports the LUA programming language. Visit our [NEW Lua Scripting Resources!](#)

Legacy Custom Scripting Language Deprecation Plans

1. New accounts (created after October 29, 2018) will only have the option to use Lua in scripts.
2. As of October 29, 2018 Custom Scripting Actions will default to Lua as the scripting type in the Custom Scripting Action for accounts created before this date. You will be able to switch to the Legacy Custom Scripting; though we highly encourage using Lua.
3. In the long term, Legacy Custom Scripting Actions will be switched to read-only. The exact date on this is to be determined; we will send notifications well ahead of time.

The PDF functions allow you to build a PDF within a response to be sent via the sgapiEmailSend function.

PHP PDF Creation - Use these functions to dynamically create a PDF document using PHP. PDFs can be output and attached to an email via the sgapiSendEmail function.

HTML to PDF Creation - Converts HTML to a PDF file. The PDF can then be attached to an email via the sgapiSendEmail function.
